PROFILE

UI/UX designer with a background in Interaction Design and Graphic Design, focused on creating clear, accessible, and visually polished digital experiences. Skilled in user research, interface design, prototyping, design systems, and storytelling-driven problem solving. Experienced in designing mobile apps, web platforms, editorial systems, and community-centered digital products that translate complex user needs into intuitive flows and thoughtful visual systems.

EXPERIENCE

Product Design Student

2022 – 2026

The George Washington University, Corcoran School of the Arts & Design · Washington, DC

- Led end-to-end UI/UX projects from research and concept development to wireframes, high-fidelity prototypes, and presentation-ready case studies.
- Designed digital products across financial access, public transportation, museum engagement, editorial design, and student support systems.
- Conducted user research, synthesized insights, and translated findings into user flows, interface decisions, and accessible visual systems.
- Partnered on real-world design projects with public sector and cultural institutions, including DDOT and the National Gallery of Art.
- Developed a thesis project exploring community-centered financial tools, trust-building, and access for underserved communities in Washington, D.C.

EDUCATION

The George Washington University

Corcoran School of the Arts & Design
BFA in Interaction Design
Minor: Graphic Design
Expected May 2026 · Washington, DC

UI/UX Design Intern

Mom n Tot Spot · Washington, DC

November 2023

- Redesigned the company's website experience with a focus on improving navigation, clarity, and access to the booking flow.
- Identified friction points in the user journey and simplified how parents could find key information and schedule services.
- Created wireframes and visual design concepts that aligned with the brand while making the site easier to understand and use.
- Collaborated with stakeholders and applied feedback to refine design direction, content structure, and usability.
- Strengthened practical experience in client communication, website redesign, and turning user needs into clearer digital experiences.

Design work across product, community, and editorial

SAGE Financial Access

Thesis Project · UI/UX Design · Financial Accessibility · Community-Centered Design

Fall 2025 – Spring 2026

- Designed a community-centered financial empowerment platform for Washington, D.C.'s Ward 7 and Ward 8 communities.
 - Explored how digital design can support financial literacy, increase trust, and reduce reliance on predatory lending.
 - Conducted research around financial access, banking distrust, resource awareness, and barriers created by historical redlining.
 - Translated research insights into product features: guided financial education, micro-loan support, resource discovery, and transparent decision breakdowns.
 - Built high-fidelity mobile prototypes focused on clarity, trust, accessibility, and user confidence.
 - Applied systems thinking to frame financial exclusion as a broader socio-technical issue rather than only an interface problem.
-

SAGE Editorial

Editorial Website · UI/UX Design · Visual System · Content Strategy

Spring 2026

- Designed an editorial website extension of the SAGE thesis project, covering local stories, community updates, and lived experiences in Ward 7 and Ward 8.
 - Created a publication-style visual direction inspired by newspaper layouts, editorial grids, and softer sage tones.
 - Developed a distinct editorial identity connected to SAGE while giving the website its own trusted, community-centered voice.
 - Focused on hierarchy, typography, content structure, and visual rhythm to make longer-form content easier to read and navigate.
 - Used editorial design to make complex social and financial issues feel more human, accessible, and grounded.
-

DDOT Safety Techs

Public Sector Partnership · UX Research · Service Design

Fall 2025-Spring 2026

- Worked on a design project focused on improving the work experience and retention of DDOT Safety Technicians.
 - Synthesized research around worker safety, emotional sustainability, weather conditions, public disrespect, and unclear advancement expectations.
 - Developed system-level design concepts around reporting, communication, support, and recruitment messaging.
 - Focused on how design can improve both physical safety and emotional sustainability within public service roles.
-

NGA Scavenger Pamphlet

National Gallery of Art Partnership · Interaction Design · Museum Experience

Spring 2025

- Designed a family-centered museum engagement concept for the National Gallery of Art's West Building.
- Created a scavenger pamphlet experience that turns museum exploration into a more playful and accessible activity for children, families, and first-time visitors.
- Used maps, clues, stamps, and collectible design elements to encourage active participation rather than passive viewing.
- Focused on making museum interpretation more approachable through visual storytelling, low-barrier interaction, and playful learning.

InTuition

Scholarship Platform · UI/UX Design · Web Experience

Fall 2024

- Designed a scholarship discovery and application platform that helps students find, organize, and apply to opportunities more efficiently.
 - Created a guided user experience with personalized filtering, reusable student information, saved opportunities, and application tracking.
 - Focused on reducing the time, confusion, and repetition often involved in the scholarship application process.
 - Developed wireframes, interface flows, and high-fidelity screens to support a cleaner and more student-centered experience.
 - Designed the platform to help students compare opportunities through clear eligibility, deadline, and requirement information.
-

GW Ride

Mobile App Design · UI/UX Design · Campus Mobility

Spring 2024

- Designed a mobile transportation app for GWU students to improve campus shuttle access and route visibility.
 - Created real-time shuttle tracking, ETA information, route details, and location-based features to support more confident campus movement.
 - Focused on reducing uncertainty, lateness, and confusion around shuttle schedules and campus transportation.
 - Built user flows, wireframes, and high-fidelity mobile screens centered on speed, clarity, and daily student use.
 - Improved the experience through clearer navigation, stronger information hierarchy, and more scannable transit details.
-

ADDITIONAL EXPERIENCE

Cloud Computing Intern

MBSYEP · Washington, DC

June – July 2021

- Gained hands-on exposure to Amazon Web Services, including EC2, Elastic Beanstalk, AWS Batch, and Lambda.
- Built an understanding of scalable, secure, and cost-conscious digital infrastructure.
- Developed stronger technical awareness that supports communication between design and engineering contexts.

Apple Coding Camp Participant

MBSYEP · Washington, DC

June – July 2020

- Developed a mobile puzzle game prototype using Python, strengthening logic, interaction, and problem-solving skills.
 - Created an interior design app concept using Keynote, combining visual presentation, interface thinking, and early product ideation.
 - Built early interest in the connection between design, technology, and interactive digital experiences.
-

DESIGN APPROACH

Design is most powerful when it makes complex experiences feel clearer, more human, and easier to act on. My process combines research, structure, visual design, and prototyping to understand what people need, where they get stuck, and how a digital experience can guide them with less friction. Across my work, I focus on clarity, accessibility, trust, and strong visual systems that support real user needs.
