The George Washington University
BFA in Interaction Design,
Minor in Graphic Design

LANGUAGE

English (Fluent)
Tagalog (Native)
Cebuano (Native)

CORE SKILLS

- UI/UX Design
- Wireframing
- User Research
- Prototyping
- Usability Testing
- Interaction Design
- Design Systems

PROFILE

Product-focused designer combining research, systems thinking, and visual design to create clear, accessible digital experiences. Strong focus on community-centered design, financial accessibility, and translating complex problems into intuitive user flows. Experience working with real stakeholders including public sector and cultural institutions.

TOOLS

Figma, Adobe Illustrator, Photoshop, InDesign, XD, Premiere Pro, Lightroom

EXPERIENCE

Product Design Student • The George Washington University, Corcoran School of the Arts and Design
Washington, DC | 2022 – 2026

- Led end-to-end UI/UX projects from research to high-fidelity prototypes, focusing on real-world systems such as public infrastructure and financial access
- Conducted user interviews, synthesized insights, and translated findings into actionable design decisions and product features
- Partnered with external stakeholders including DDOT and the National Gallery of Art to design user-centered solutions
- Currently designing a thesis product exploring community-driven financial tools to reduce reliance on predatory lending and improve access in underserved communities
- Applied systems thinking and equity-centered design frameworks to address complex socio-technical challenges

UI/UX Design Intern • Mom n Tot Spot
Washington, DC | Nov-Dec 2023

- Redesigned website experience to improve navigation and booking flow, prioritizing usability and clarity for parents
- Identified friction points in user journey and simplified access to core actions (booking and information)
- Delivered wireframes and visual designs aligned with brand and user needs
- Collaborated with stakeholders to iterate based on feedback and usability considerations

Apple Coding Camp Participant • MBSYEP
Washington, DC | Jun 2020 – Jul 2020

- Developed a mobile game prototype using Python, focusing on logic and interaction design
- Designed an interior design app concept, blending UX thinking with visual presentation
- Sparked long-term interest in the intersection of design and technology
